Education

SRM University AP, Andhra Pradesh, India
B.Tech, Computer Science and Engineering

October 2022 - May 2026
CGPA: 8.58/10

Professional Experience

Software Developer Intern, SwishX

February 2026 - Present

- Built a **6-level sales hierarchy engine** using **recursive PostgreSQL CTEs**; enabled single-query subtree retrieval across 401 employees, **19,028+ retailers** and **4,038+ stockists** spanning 24 states and 10 divisions.
- Automated **MOQ-based cashback** for retailers by integrating scheme evaluation into the **wallet credit flow**, replacing a manual points-grant process; supported **90 active schemes** and **568 MOQ rules**.
- Deployed a production-ready CMS backend in **Golang** using the **Factory Pattern**, delivering **20+ REST APIs** across 3 product verticals with Redis caching and AWS S3 storage integration.
- Researched and evaluated **5 fuzzy string matching** algorithms for automated name reconciliation during KYC verification; results led to significantly improved approval rates for **7,000+ users** on the platform.
- Tech:** Go (Golang), Gin, PostgreSQL, Redis, REST APIs, Microservices, Docker, AWS, CI/CD

Full Stack Developer Intern, Black Komodo Investments

January 2025 - March 2025

- Developed and delivered scalable features using **React.js** and **Spring Boot**, optimizing performance and reducing page load time by **20%**; supported seamless user experiences for over **1,000 monthly active users**.
- Tech:** React.js, Spring Boot, Java, REST APIs

Projects

Git Analyzer - RAG-Based Repository Insight Engine · GitHub

October 2025

- Developed a **RAG (Retrieval-Augmented Generation)** Git Analyzer providing contextual insights into code evolution, commit patterns, and development trends across a repository by combining semantic retrieval.
- Integrated AI-driven semantic search, question answering, and summarization over **1,000+ commits**, with dependency graphs and contribution heatmaps to help developers understand code changes and project history.
- Tech:** Java, Spring Boot, React, Spring Security, Ollama, PGVector

AI Resume Builder · GitHub · Live

June 2025

- Built a full-stack application for generating personalised resumes from **5+ templates**, featuring secure **JWT/OAuth2** authentication, real-time editing, and PDF export, reducing resume creation time by **80%**.
- Tech:** React, Java, Spring Boot, PostgreSQL, JWT, OAuth2, OpenAI API

Amigo - Roommate Finder Platform · GitHub · Live

December 2024

- Engineered a roommate-finding platform with search, property listings, and interactive map visualisation, improving data retrieval by **40%** through optimized **Firestore** queries and efficient client-side state management using **Zustand**.
- Tech:** React.js, Firebase, Firestore, Zustand

Technical Skills

Languages: Java, Golang, Python, JavaScript, C/C++, SQL

Backend and APIs: Gin, Spring Boot, Spring AI, Spring Security, JPA, Hibernate, Microservices, ReactJS, REST APIs

Data, Cloud and DevOps: PostgreSQL, Redis, MySQL, MongoDB, PGVector, AWS, Docker, CI/CD, Git & GitHub

AI, Machine Learning and Agents: RAG, LangChain, TensorFlow, Scikit-learn, NumPy, Pandas, Claude Code, Codex

Engineering Practices: Data Structures and Algorithms, Object-Oriented Programming (OOP), High-level design (HLD), Software Development Life Cycle (SDLC), Design Patterns, Multi-threading, Concurrency, Debugging, Unit Testing

Achievements / Certifications

- Open Source Contributor – Dodo Payments:** Implemented toggleable plan selection in the billing UI
- Oracle Certified Professional:** Java SE 17 Developer

Extra Curricular Activities

- Community Engagement:** Organised 2 Blood Donation Camps, Beach Cleaning Drives, and Disaster Relief Fund collections with the National Service Scheme.
